Docket #: S90-102

Rat Antibodies (TR310; R1-2; 6C3)

These cell lines include monoclonal antibodies for research purposes.

Rat Antibodies (TR310; R1-2; 6C3)

TR301: Specificity - Reacts with Vb 7 TCR bearing T cells. May be deleted in mouse strains expressing the Mls-1 phenotype.

R1-2: Specificity - Reacts witht eh 160kD a4chain of the mouse lymphocyte surgace receptor (LPAM-1) for Peyer's patch high endothelial venule determinants. This receptor appears to be required for lymphocyte homing into Peyer's Patches in vivo.

6C3: Specificity - reacts with the 6C3/BP-1 antigen found on pre-B and early B cells.

Applications

- flow cytometry

Innovators

- Irving Weissman
- Bernhard Holzmann
- Craig Okada
- Eric Pillemer
