Docket #: S06-418

Multi-point Viewing of Panoramic Video

Stanford researchers have created software to view panoramic videos from arbitrary viewpoints from separate non-overlapping geo-referenced panoramic video streams. Ths system can also synthesize missing panoramic images to provide the user with a full sequence.

Applications

- Virtual tours
- Interactive video

Advantages

- Multiple viewpoint viewing

Publications

- System and process for synthesizing location-referenced panoramic images and video US Patent Application US20080106593
