Docket #: S07-034

Software System for Collecting, Storing, Processing & Serving Panoramic Images and Movies

This software system acquires panoramic video footage and makes the data viewable on a Web browser. The system enables a human editor to select specific subsequences of the data, and organize it, and have others view it.

Applications

- panoramic data storage in real-time
- data processing for interactive viewing
- data serving on a Web browser

Advantages

- Provides a full solution from panoramic data acquisition to viewing on a Web browser

Innovators

- Sebastian Thrun
- Hendrik Dahlkamp
- Joakim Arfvidsson
- Andrew Lookingbill
- Michael Montemerlo
